

The drawing illustrates a road cross-section with a slope. The main profile shows a horizontal distance of 16.55 units from the start of the slope to a point at elevation 485.53. The slope itself is defined by a dashed blue line. A detailed view of the slope's reinforcement structure is shown on the right, featuring a grid of reinforcement layers and a concrete structure. The reinforcement layers are labeled 'RETE DI RINFORZO' and 'CHIODATURE L=5.0m'. The concrete structure is labeled 'COSTRUZIONE IN C.A.' and 'COSTRUZIONE IN C.A.'. The detailed view shows a cross-section of the slope with a width of 3.75 units and a height of 3.25 units. The reinforcement layers are spaced at 0.25 units intervals. The concrete structure is shown with a width of 0.25 units and a height of 0.25 units. The detailed view also shows the reinforcement layers and the concrete structure in a cross-section view.

Technical drawing of a reinforced concrete retaining wall with a slope. The drawing shows the wall structure, reinforcement, and dimensions. The wall is 10.00m high. The slope is 1:1. The wall is made of concrete with a thickness of 0.30m. The reinforcement is made of steel bars with a diameter of 12mm. The wall is located on a slope of 1:1. The drawing includes a table of dimensions and a table of elevations.

Technical drawing of a road cross-section showing a slope, a retaining wall, and a drainage system. The drawing includes labels for 'BARRIERA IN B.P.', 'MURO DI CONTENIMENTO', 'RETE DI RINFORZO', and 'CASSONATA'. A table at the bottom provides distance and elevation data for the terrain and the project.
